

Ignite Your Game!™ Play Better, Faster, and Longer™
SHOCKTOWER
 SPORTS SURFACING by SnapSports®

Performance : Play better and faster!

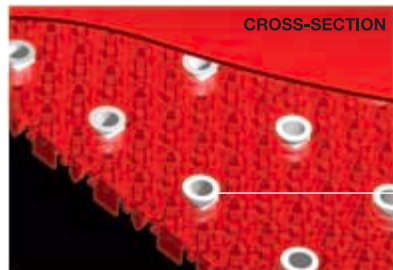

The ShockTower understructure provides unsurpassed ball performance and play. Engineered to withstand competition at the highest levels, **ReactivePlay™** energy return technology provides fantastic ball response and more power to the player!

Safety : Play longer!

Patented **ReactivePlay™** also gives an added level of absorption to reduce impact on joints and limbs, letting you play longer and harder today and for years to come.

Functionality : Play now!

BounceBack ShockTower Sports Surfacing installs easily. Each panel weighs much less than standard rubber flooring. Use it to upgrade your tired old gym in as little as one day.

Sixteen individual contact points ensure a consistent playing surface and excellent coefficient of friction to keep the surface in place.

The patented resilient shock technology was designed with performance and safety in mind. The 2mm shock deflection offers excellent impact control and ball response while providing excellent rolling load support.
